

Email Updates

We provide all clients with automatic updates of new properties for sale.

We configure our MLS system to update you when new properties come on the market that match your criteria. You can opt for daily or weekly email summaries that make it easy to monitor everything that's going on with your area of interest or receive instant email notifications the moment a new property is added to the MLS. Whether you are looking for a convenient way to stay on top of the market or want to respond at a moments notice, we've got you covered.
